The screenshot shows a Google Colab notebook interface. The top bar includes tabs for SSH, lawdroid/CLASS, robo-greeno-dat, Mojo tutorial from, and mucojo github. The notebook title is "00_colab_smoke_test.ipynb". The left sidebar shows the file explorer with "00_colab_smoke_test.ipynb" selected. The main area displays the notebook content, which includes a progress bar for the MuJoCo installation. The progress bar shows the following details:

File	Size	Speed	ETA
42.5/42.5	42.5 MB	4.5 MB/s	0:00:00
7.2/7.2	7.2 MB	144.5 MB/s	0:00:00
7.0/7.0	7.0 MB	185.1 MB/s	0:00:00
187.5/187.5	187.5 MB	22.4 MB/s	0:00:00
952.1/952.1	952.1 MB	72.3 MB/s	0:00:00
243.5/243.5	243.5 MB	38.2 MB/s	0:00:00
741.0/741.0	741.0 MB	59.5 MB/s	0:00:00
4.9/4.9	4.9 MB	135.9 MB/s	0:00:00

Below the progress bar, the text "install OK" is displayed. The notebook content includes a section titled "Step 2 — confirm MuJoCo CPU sim + render (~1 min)". The text below this section reads: "Drops a red ball onto a grey plane and renders 120 frames offscreen. Proves MuJoCo CPU + offscreen rendering work — the same pipeline used for the IK and IMU labs. Expected: a 2-second video of a bouncing red ball, plus MuJoCo CPU sim + render: OK."

The code cell contains the following Python code:

```
1 import os
2 os.environ.setdefault("MUJOOCO_GL", "egl") # offscreen GL backend for headless Colab
3
4 import mujoco, mediapy as media, numpy as np
5
6 xml = """
7 <mujoco>
8   <worldbody>
9     <light pos="0 0 3"/>
10    <geom type="plane" size="2 2 0.1" rgba=".7 .7 .7 1"/>
11    <body pos="0 0 .3">
12      <joint type="free"/>
13      <geom type="sphere" size=".1" rgba=".8 .2 .2 1"/>
14    </body>
15  </worldbody>
16 </mujoco>
17 """
18
19 model = mujoco.MjModel.from_xml_string(xml)
20 data = mujoco.MjData(model)
21 renderer = mujoco.Renderer(model, height=240, width=320)
22
23 frames = []
24 for _ in range(120):
25   mujoco.mj_step(model, data)
26   renderer.update_scene(data)
27   frames.append(renderer.render())
28
29 media.show_video(frames, fps=60)
30 print("MuJoCo CPU sim + render: OK")
31
```

At the bottom of the code cell, there is a small video player showing a red ball on a grey plane. The text "MuJoCo CPU sim + render: OK" is displayed below the video player.
